

**Exercise 4, due December 5, 2019**

Read the Chapter 2 "Dynamic Field Theory: Foundations" by Gregor Schöner and Anne Schutte in the book "Dynamic Thinking" (available as page proof on the course web page). You don't need to read the boxes and you may stop reading at "The memory trace".

1. All I want you to do really is to read and try to understand the chapter. To document that you did so, please write a short text, one or two pages, in which you describe one point that you understood well or that you found interesting or important.
2. Also formulate one issue that you struggle to understand or have a question about. Try to be precise in framing the question, using the terminology you learned from the lecture and chapters.
